SyTech
XLReporter® Team

The Next Generation of Reports, Forms and Dashboards

XLReporter Team offers stunning interactive reports across the organization for people to monitor key trends and relationships that drive their processes.

✓ **Reporting Where Less is More**
  - Less costly to buy, design and implement.
  - More familiar environment to design and connect to the data servers.
  - More advanced reporting capabilities.
  - More interactive reporting across the organization for pre-emptive decisions.

✓ **Reports for Everyone**
XLReporter is the complete solution for designing, creating, scheduling, viewing and sharing reports within your organization.

It is intended for professionals who want to create reports using their existing knowledge of Excel to design templates and avoid the challenge of learning new software.

✓ **Quick Return On Investment**
Design templates quickly in the familiar environment of Microsoft Excel and take full advantage of all the features of Excel, such as validation, charts, formulas and formatting.
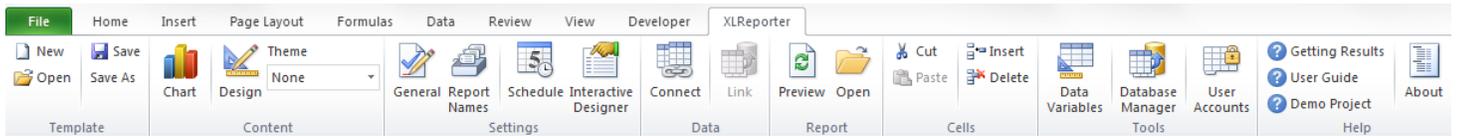

Connect to data sources by picking data fields and defining report parameters. In a matter of hours, not days, reports are ready for your organization.

✓ **Start Small and Grow**
Start on a standalone workstation generating reports automatically and grow to a team of workstations, each submitting their own form data and requesting their own custom report.

XLReporter fits any budget and seamlessly integrates into any existing system. No executive decisions or additional hardware required.

Menu bar: File | Home | Insert | Page Layout | Formulas | Data | Review | View | Developer | XLReporter

Ribbon groups: Template | Content | Settings | Data | Report | Cells | Tools | Help

✓ **Empower Your Team**

Spread the reporting power of XLReporter throughout your organization using consistently formatted reports and forms from a central location.

Install the lightweight reporting components from a web browser and you are ready to produce, view, print, email and share reports. User access is secured and personalized by user profiles.

✓ **True Interactive Reporting**

Interactive templates are launched from an intranet site, a webpage or locally from your PC and display exactly the same as when they were designed in Excel.

When reports are produced, the data sources are not directly accessed by team clients but are made available through secure server-side reporting services. Response is fast, reliable and suitable for multiple users.

✓ **Take Reports to another Dimension**

XLReporter provides layers of report analysis which would otherwise require intense manual effort or programming to accomplish.

Conditional summaries, analytical calculations and interlacing data from two disparate sources are just a few examples of the "out of the box" capabilities.
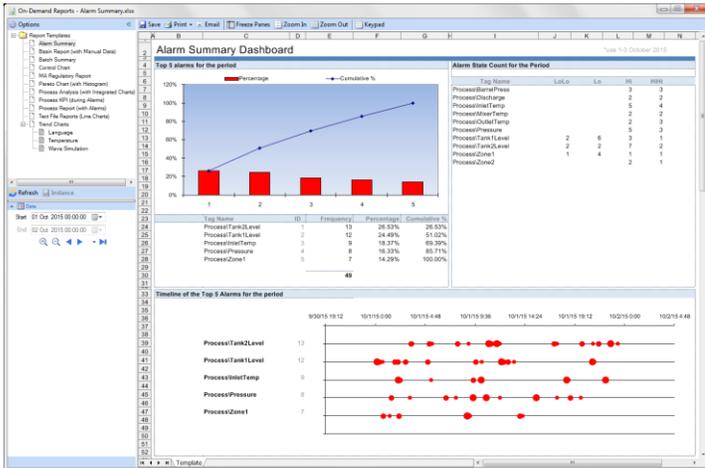

If you can think it…, XLReporter can do it.

✓ **Features**

➢ Over 70 connectors to data sources in industry
➢ Template Library reports in minutes, *guaranteed!*
➢ Template Studio in Excel 2007, 2010, 2013, 2016
➢ Proprietary reporting engine
➢ Report automatically, periodically or on events
➢ Publish reports as workbooks or encrypted PDF
➢ Distribute reports by email, web pages or FTP
